County Surveyor Harris County,
Houston, Texas.

Dear Sir:

Referring to the above file number covering a claim in the name of Adolph Roesel under the act of 1900, have to advise that neither the field notes of the Wm. Hobby or T. J. Nichols surveys call for any objects, natural or artificial, whereby they would be separated. They both call merely for "stake and mound" or "Stake in prairie." The Nichols survey, which was made by H. W. Stamm 18 years after the Wm. Hobby, does ~~not~~, however, call for its N.E. corner of to be at the N.W. corner of said Hobby. Likewise at the S.W. and S.E. corners of the Solomon Brown grant nothing is called for, these two surveys merely calling for its South line and S.E. corner. I fail to see how the said Hobby and Nichols surveys are to be separated. Hence, will hold that from the evidence in their field notes and that of surrounding surveys there is nothing raised tending to their separation, and, therefore, this survey would accordingly be on the Wm. Hobby patented survey, (Harris 2.43) of 767 $\frac{5}{8}$ acres.

June 3, 1905.

Mr. Adolph Roesel,

Rose Hill, Texas.

Dear Sir:

Referring to file No. 6515, survey 34 covering 22.5 acres made for you in Harris county under the act of February 23, 1900, you are advised that action is suspended on this claim for the reason that the field notes of the Wm. Hobby nor T. J. Nichols call for any objects, natural or artificial, whereby they would be separated. They both call merely for "stake and mound" or stake in prairie". The Nichols survey which was made by H. W. Stamm 18 years after the Wm. Hobby does, however, call for its N.E. corner to be at the N.W. corner of said Hobby, likewise at the S.W. and S.E. corners of the Solomon Brown grant nothing is called for, these are two surveys merely calling for its South line and S.E. corner. I fail to see how the said Hobby and Nichols surveys are to be separated. Hence, will hold that from the evidence in their field notes and that of surrounding surveys there is nothing raised tending to their separation, and therefore, their survey would accordingly be on the Wm. Hobby patented survey, (Harris 2.43) of 767 ⁷/₈ acres.

The County Surveyor of Harris County was advised of the status of this file under date of December 15, 1904. This claim has been suspended for quite a length of time, but up to this time this department has not received any information regarding same. I will call your attention to the fact that this department will again take up this file on September 1, 1905, and should the data as required in the letter above referred to be furnished this office at that time, then this claim will be canceled on account of non-compliance with requirements of this department. I would further state that if this is done by this department, that is, your claim rejected on that date for reason stated, this department will consider any subsequent application covering the same land, and a sale will be made thereon if the law and the requirements of this office are in all respects complied with. I am suspending this claim to September 1, 1905, because under the new land law, effective April 15, 1905, the Commissioner of the Land Office is prohibited from making any sales or leases prior to that date. I am sending the County Surveyor of Harris County a carbon copy of this letter for his information.

Mr. Adolph Rosen

Keene Hill, Texas

Dear Sir:

Referring to file No. 6515, survey of covering 2.5 acres made for you in Harris County under the act of February 22, 1905, you are advised that the same has been returned to the land office. The field notes of the W. H. Hobbie and J. L. Nichols survey are not correct, and they would be corrected. The field notes are merely for "reference" or "check" in the office. The Nichols survey which was made by W. H. Hobbie 12 years after the W. H. Hobbie survey, will for the W. H. Hobbie corner to be at the W. H. Hobbie corner, like-wise at the S. W. and S. E. corners of the section shown by the survey is called for, these two surveys merely calling for the south line and S. E. corner. I fail to see how the said Hobbie and Nichols surveys are to be separated. Hence, will hold that the evidence in their field notes and that of surrounding surveys there is nothing raised tending to their separation, and therefore, that survey would be considered as one. The County Surveyor of Harris County was advised of the status of this file under date of December 15, 1905. This claim has been suspended for quite a length of time, but up to this time this department has not received any information regarding same. I will call your attention to the fact that this department will again take up this file on September 1, 1908, and should the date be registered in the land office, it will be cancelled on account of non-compliance with requirements of this department. I would further state that if this is done by this department, that is, your claim rejected on that date for reason stated, this department will consider any subsequent application covering the same land, and a sale will be made thereon if the law and the requirements of this office are in all respects complied with. I am suspending this claim to September 1, 1908, because the new land law, effective April 15, 1905, the Commissioner of the Land Office is prohibited from making any sales on lands prior to that date.
